INTRODUCTION

The Berrima District Statistical Handbook brings together available statistical data relating to the local government areas of Berrima Municipality and Mittagong and Wingecarribee Shires. It is the second of three statistical handbooks dealing with the component districts of the Illawarra Region. Statistical Handbook #1 covers the Wollongong Statistical District, and Statistical Handbook #3 deals with Shellharbour Shire.

The objective of the handbook series is to provide ready, reliable and reasonably comprehensive sources of data about the Illawarra Region, and its constituent local government areas, for people in many aspects of community life. It is hoped the information in the handbooks will aid informed decision making by business men, trade unionists, civil servants and politicians, as well as serving as a research aid for students at all levels.

The Statistical Handbook brings together detailed information from the censuses of 1954, 1961, 1966 and 1971 relating to the population characteristics, housing and economic activities of the population of the Berrima District and its constituent local government areas. In addition, the handbook contains a variety of statistical series derived from the annual reports of various State government departments and instrumentalities.

Revised and expanded editions of the three statistical handbooks will be published in early 1979, when detailed information will be available from the 1976 census.

The statistical handbooks are a joint project of the Illawarra Regional Advisory Council and the Economics Department of the University of Wollongong. Data in the handbooks has been prepared by students in the Economics Department, employed on a part time basis. Typing services have been provided by the Department of Decentralisation and the Economics Department. Funds for compiling

and printing the handbooks have been provided by the Illawarra Regional Advisory Council.

Supervision and direction of the project is by John Steinke, Senior Lecturer in Economics at the University of Wollongong and Research Director of the Regional Advisory Council.
